ROTARY VALVES

RV

旋转阀

ROTARY VALVES RV SERIES

RV旋转阀的应用范围十分广阔。它是控制粉体或颗粒状固体装入料仓，料斗或离心分离器以及从这些设备中释放的理想工具，它坚固而紧凑的设计使我们能够很容易地取出它内部的工作部件。

根据不同的流量要求，我们提供了各种不同的型号。

RV rotary valves have been designed for universal use. They are ideally suited to control delivery or discharge of powder or pelletized products to and from silos, hoppers, pneumatic conveying systems, bag filters and centrifugal separators.

Its strong and compact design makes it a simple matter to access the internal working parts.

Different types are available according to the required flow rates.

型号 TYPE	RV2	RV5	RV10	RV20
升/转 LITRES PER REVOLUTION	2,2	5,4	10,9	19,5

选型

SIZING

下面的理论图表提供了一些选用阀门型号的准则。然而，试想一下，箱体负载会根据释放的物料类型和转速而变化。

这里提供了三种标准转速：10/20/30rpm。此外，产品还包括了从4至22rpm的调速范围。

The following theoretical diagram provides some general guidelines on the type of valve to be used. Bear in mind, however, that the box load will vary according to the type of material discharged and the rotational speed.

Three standard speeds are available: 10/20/30 rpm. In addition, the range will include a range variator from 4 to 22 rpm.

选型

虽然我们已经提供了多种型号，但还是无法提供针对每种物料特性的图表。然而，我们在这里提供了一些重要数据使您很容易做出正确选择。

- a) 阀的箱体负载的粉尘或相似的物料约占理论数值的80%时，及阀的转速为20rpm时，可达最佳状态。
- b) 低转速意味着低磨损，因此，当处理摩擦性强的物料时，最好选用大容量低转速的型号。
- c) 阀体结构所用材质根据处理的物料类型决定。

三种基本类型：

1. 非沾染性物料：
阀体—灰色铸铁；阀盖—铸铁；转子—铸铁或钢
2. 摩擦性物料
阀体—铸铁镀铬/镍；阀盖—铸铁镀铬/镍；转子—钢或铸铁带Vulkolan刮片。
3. 腐蚀性物料
阀体—铸铁镀铬/镍；阀盖—铸铁镀铬/镍；转子—不锈钢。

SIZING

Given the variety of types, specific diagrams for every material have not been prepared. However, here are some essential data to make a correct choice easier:

- a) The box load for powder or similar material is more or less 80% of the theoretical value and optimum levels can be obtained with valve rotation at 20 rpm.
- b) Low valve rotation means low wear level, thus, if you are working with abrasive materials, it is better to use large capacity valves which run at low speed.
- c) The construction material depends on the type of material to handle.

There are three basic types:

- 1) **Non-contaminating materials:** body - gray cast iron; covers - cast iron; rotor - cast iron or steel.
- 2) **Abrasive products:** body - chromium or nickel plated cast iron; covers - chromium or nickel plated cast iron; rotor - steel or cast iron with Vulkolan scrapers.
- 3) **Corrosive products:** body - chromium or nickel plated cast iron; covers - chromium or nickel plated cast iron; rotor - stainless steel.
